CLEAN ENERGY TECHNOLOGY

CERTIFICATE

As the leader in the boiler manufacturing segment globally, VYNCKE constantly strives to evolve and support innovations in the areas of energy efficiency and environment protection, and works internally, as well as with partners and customers, to encourage, develop and deploy such solutions.

We certify that the eco friendly, carbon neutral biopellets from Abellon CleanEnergy - are compatible, efficient, and safe to use in our boiler.

Composition: pellets from wood waste from saw mills majorly pine. They are a mixture of wood chips and saw dust.

Specifications: Euro fin.

We appreciate Abellon's efforts and commitment to delivering Bio-Energy solutions that can effectively mitigate the twin global threats of global warming and energy dependence. Our best wishes and support are with them at all times.

For and On Behalf Of,

VYNCKE ENERGIETECHNIEK N.V.

Jef MESTDAGH
